WORK EXPERIENCE

Train-the-Trainer Facilitator – techKNOWtutors CSCNL (Full-time) **Jan. 2024 – Present**

- Creates curriculum and conducts workshops, empowering individuals with essential digital skills in Newfoundland.
- Engages with nonprofits and volunteers ensuring the sustainability of digital skills initiatives beyond techKNOWtutors.

Full-Stack Developer – NL Eats (Volunteer) **May 2020 – Dec. 2020**

- Elevated the project's user experience using the power of React.
- Improved data efficiency by streamlining the database schema.

PROJECTS

GoScreen AI – Solo Project – Web App **Nov. 2023**

- Crafted a dynamic web application, leveraging ChatGPT to provide personalized movie recommendations.
- Share your preferences, discover curated suggestions in an engaging interface with all the details you need.

Shorten URL – Solo Project – Chrome Extension **Oct. 2023**

- Created and launched a Chrome extension for efficient web link sharing, with future feature updates planned.
- Successfully published the extension on the Chrome Web Store, expanding its accessibility.

Heart Disease Prediction - Team Project - Machine Learning **Dec. 2022**

- Achieved 85% prediction accuracy on medical data.
- Enhanced model performance through data scaling techniques.

MyFlex – Team Project – Web App **Jun. 2020 – Jul. 2020**

- Coordinated a team effort to build a web app for efficient movie selection with recommendations and tracking.
- Optimized backend with Node, Express, and MongoDB for a significant performance boost in data access.
